- Long Lead Time analysis (LLI)
- Alerting and Exception management
- Safety Stocks an Days of Inventory alerts

Global Supply Chain Visibility

The following components of the Netlog™ information enabling platform work together to provide a unified view across the entire Supply Chain, thus enabling the sharing of inventory, documents and transaction flow information between customers, partners and service providers in near real-time.

- Comprehensive Data Integration tools
  - Smart Software Agents and Mapping Services are used to marshal partners' transactional data
  - Pre-built technology adapters support all major communications protocols
  - Application Adapters support leading ERP and Manufacturing as well as proprietary legacy systems
  - Messaging platform

- The Business Process Modeler provides a graphics design tool that easily defines Client and Customer specific processes, which includes Events, Metrics, Alerts and Reports

- The Supply Chain Visibility Portal provides Clients and Customers with a rich graphical toolset that enables
  - A birds-eye view of all processes
  - Drill down to transaction level
  - Pinpoints exceptions and alerts
  - Key Performance Indicators

Made4net develops comprehensive and innovative software solutions to enable superior collaborative supply chain execution. Our vision is to help distributors and 3PLs leverage their logistics and supply chain operations by providing them with a true web-based logistics networked solution through our SCExpert™ platform.
