

# YardExpert™

**Creates visibility to warehouse of what is on incoming vehicles in the yard, enabling prioritization of assignment of vehicles to docks and unloading according to the needs in the warehouse.**

---

**Streamlines vehicles flow in the yard by reducing the check-in time and wait time in the yard.**

---

**Extends the management of your distribution facility beyond the four walls of the warehouse, allowing efficient control of the inventory in the yard.**

---

**Tracks pertinent information about vehicles, including source, status and usage information; who brought the vehicle and who owns it, where the vehicle is, what is on it and how long it has been there, where and when is the vehicle expected to go.**

---

**Extends the management and optimization of warehouse receiving and shipping operations, resulting in improved throughput and customer service.**

---

**Provides effective task organization of vehicle moves transmitted by RF to yard jockeys. This enables warehouse personnel to know which vehicles need to be moved, their location in the yard, the location to which they are going and which yard jockeys are available to do the job. It also allows them to match work tasks with available vehicles.**

# YardExpert™

Lack of synchronization between warehouse operations and vehicles movements in the yard often leads to costly operational bottlenecks that negatively affect throughput and customer service.

Not-optimized dock scheduling leads to poor dock utilization, excessive work of warehouse receiving personnel and overtime.

Made4net's Yard Management System, **YardExpert™**, turns these challenges into an opportunity by providing the necessary management tools to optimize yard vehicle movements and dock utilization while extending warehouse visibility.

## YardExpert™ Key Features:

Automated dock scheduling	RTLS / RFID tracking of vehicle position in yard
Yard jockey task management via RF	Rules based configurable vehicle flow in yard
Calculating loading / unloading time	Managed receiving capacity by door and by warehouse
Yard gate check-in and check-out	Inventory stored in vehicles in the yard
Real-time yard visibility through graphic display	Yard analytics and reporting
